

KIKFIA

CUSTOM PORTABLE HOUSES

Custom Portable Housing Solutions. ADUs, expandable, tiny and modular homes, plus complete modular buildings for business, hospitality and community projects.

ABOUT KIKFIA

Your partner for portable and modular buildings.

KIKFIA helps homeowners, investors, businesses and institutions get quality space faster, with a custom design and one team supporting them from first idea to final installation.

We work with an established network of manufacturing partners and match every project to the right building system: expandable, folding, modular or steel structure. You choose the layout, finishes and options. We coordinate design, production, shipping and installation support.

Whether you need one backyard ADU or a complete resort, school or workforce site, you get the same care, clear communication and written commitments.

SECTORS SERVED

5

PROJECT SIZE

1 unit to full sites

DESIGN

Custom every time

BUILD

Factory-made quality

DELIVERY

U.S. & worldwide

MISSION

Better space, sooner.

Make quality living and working space faster and simpler to own.

VISION

A building for every plan.

Adding a home, an office or a whole site should feel easy and predictable.

QUALITY

Confirmed in writing.

Materials, sizes and finishes are agreed before production starts.

CUSTOMIZATION

Built your way.

Every design is adapted to your site, your use and your style.

WHY CUSTOMERS TRUST KIKFIA

Confidence at every step of your project.

PEACE OF MIND

One partner from your first question to final installation.

Customized Solutions

Every building is planned around your site, your budget and how you will use it.

International Project Support

We coordinate production, shipping and documents for projects in the U.S. and abroad.

Professional Design Assistance

Floor plans, finishes and drawings are prepared for your approval before anything is built.

Manufacturing Partner Network

Established factories matched to each product, from a single home to a complete site.

Quality-Focused Approach

Galvanized steel structures, specifications confirmed in writing and checks before shipping.

Customer-Centered Service

One dedicated contact who answers clearly and keeps you informed at every step.

Project Consultation Support

A free consultation to choose the right model, size and options for your goals.

Long-Term Cooperation

Support after delivery, plus a partner for repeat orders and multi-phase projects.

No surprises.

Clear drawings, itemized quotes and a written schedule before production begins.

PRODUCTS & SOLUTIONS

Four core products. One partner for every project.

Core products

OUR MAIN FOCUS

ADU Houses

p. 06

A complete second home for family, guests or rental income.

Expandable Houses

CUSTOMIZATION

Designed around you.

Choose what matters to you. We turn your choices into drawings you approve before anything is built.

Floor Plans

Open plan or one to three bedrooms, arranged around how you live.

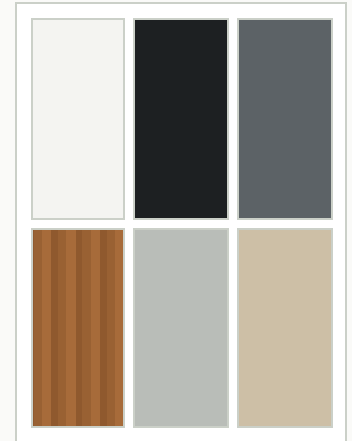

Interior Layout

Move walls, kitchens and bathrooms. Add storage and built-ins.

Exterior Design

Verandas, canopies, decks, stairs and roof styles.

Colors

Frame and wall colors from white and black to woodgrain and sand.

Windows

Sliding, awning or floor-to-ceiling glass, single or double glazed.

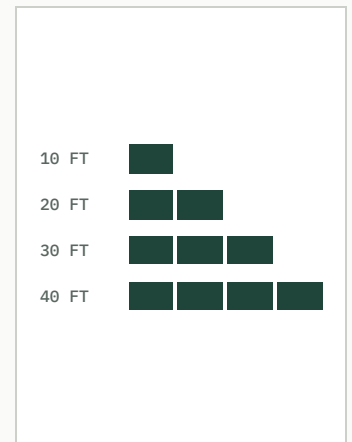

Doors

Steel security, glass sliding or hinged aluminum doors.

Materials

Choose wall panels, cladding, flooring and countertops.

Sizes

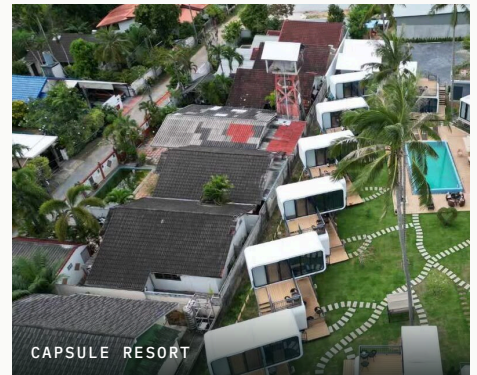

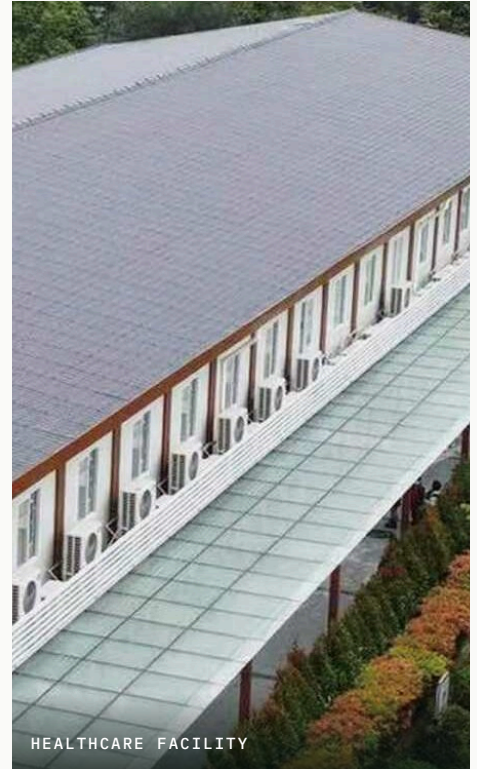

Standard 10–40 ft modules, combined side by side or stacked.

Have your own design?

Send us your drawings or site plan and we will adapt our building systems to fit.

PROJECT GALLERY • COMPLETED PROJECTS

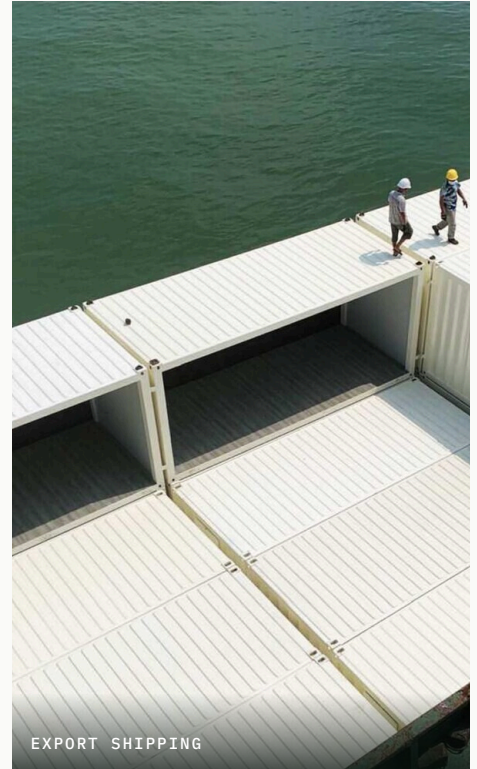

Real buildings, really delivered.

Projects shown were delivered through KIKFIA's manufacturing partner network. Finishes, sizes and site work vary by project.

PROJECT GALLERY • INSTALLATION & DELIVERY

From factory floor to finished site.

Installation and delivery photos from projects completed through KIKFIA's manufacturing partner network.

HOW WE WORK

Six simple steps to your new building.

You always know what happens next, what you receive and what we need from you.

01

Consultation

Tell us about your site, budget and goals. We recommend the right products.

YOU GET Model suggestions and a budget range

02

Project Discussion

We confirm quantities, timeline, delivery location and local requirements.

YOU GET A clear project scope

03

Design & Customization

Your layout, finishes and options become drawings for your approval.

YOU GET Approved drawings and written quote

04

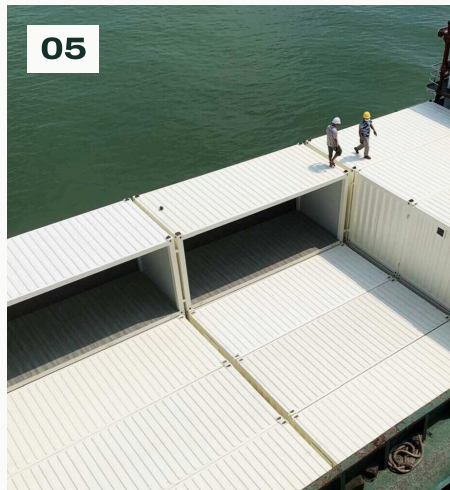

Manufacturing

Your building is made to the approved specification in the factory.

YOU GET Progress updates and a pre-shipment check

05

Delivery

We arrange packing, freight and delivery to your site or nearest port.

YOU GET Shipping schedule and documents

06

Installation Support

Guides and direct help while your local crew sets the building.

YOU GET Installation guide and ongoing support

WHY CUSTOMERS CHOOSE KIKFIA

Peace of mind, built in.

Reliability

We do what we quote, on the schedule we agree, and keep you informed at every step.

Customization

Your layout, finishes, colors and size. Every project is adapted to you.

Quality

Galvanized steel structures, quality finishes and a check before every shipment.

Transparency

Itemized quotes listing the building, options, shipping and what is not included.

Long-Term Support

Documents, installation guidance and help with questions long after delivery.

Small or large

One studio or a multi-building site, you get the same care and one point of contact.

COMMITMENT TO QUALITY

- ☒ **Galvanized steel structure**
Corrosion-resistant frames on every building.
- ☒ **Everything confirmed in writing**
Materials, sizes, finishes and options before production.
- ☒ **Production updates**
Photos and progress reports while your building is made.
- ☒ **Pre-shipment check**
Finishes and fittings reviewed before shipping.
- ☒ **Drawings and guides included**
Documentation for your installer and permit office.
- ☒ **One point of contact**
A dedicated person who knows your project.

QUESTIONS BUYERS ASK

Straight answers before you start.

Can I change the floor plan?

Yes. Every model can be adapted: walls, kitchen, bathroom, windows, doors and finishes. You approve the drawings before production.

Do I need a permit?

Rules differ by city and county. We provide drawings and specifications to support your application. Your local authority makes the final decision.

What do I prepare on site?

A level foundation (slab, piers or screw piles) and utility connections, arranged with a local contractor. We share the foundation and connection details.

How is my building delivered?

Units ship in standard containers, flat-packed or as expandable modules. We coordinate freight to your site or nearest port and send all shipping documents.

How long does it take?

It depends on the model, customization and quantity. Your written quote includes a production and shipping schedule.

What is included in the price?

Your itemized quote lists the building, options, packing and shipping, plus anything not included, such as foundations and local installation.

Do you help with installation?

Yes. You receive installation guides and drawings, and we support your local crew directly during setup.

Can you handle large projects?

Yes. Through our manufacturing partner network we support single homes through resorts, camps and multi-building sites, delivered in phases if needed.

Still have questions?

Book a free consultation. We will walk you through options, timing and costs for your site.

Let's plan your project.

Tell us what you want to build, where it is going and your budget. We will recommend the right solution and send a clear, written quote.
